Based in Sonoma County, Positive Images is an LGBTQIA+ Community Center established in 1990. We provide support to the North Bay's LGBTQIA+ population, with an emphasis on identities and individuals at the margins – including

transgender and nonbinary individuals, LGBTQIA+ people of color, Latine families, neurodivergent people, and disabled people. We are dedicated to providing essential services that encompass mental health support, advocacy, and education.

Our vision extends beyond the conventional approach of LGBTQIA+ centers, as we actively practice anti-racism, cultivate culturally informed programming, offer training that promotes understanding and empathy, and relentlessly uplift identities that have long been marginalized, including transgender and nonbinary individuals, LGBTQIA+ people of color, Latine families, neurodivergent people, and disabled people.

Strawberries (genus *Fragaria*), genus of more than 20 species of flowering plants in the rose family (*Rosaceae*) and their edible fruit. Strawberries are native to the temperate regions of the Northern Hemisphere, and cultivated varieties are widely grown throughout the world. The fruits are rich in vitamin C and are commonly eaten fresh as a dessert fruit, are used as a pastry or pie filling, and may be preserved in many ways. Botanically, the strawberry fruit is considered an “accessory fruit” and is not a true berry. The flesh consists of the greatly enlarged

flower receptacle and is embedded with the many true fruits, or achenes, which are popularly called seeds.
