POSITIVE IMAGES

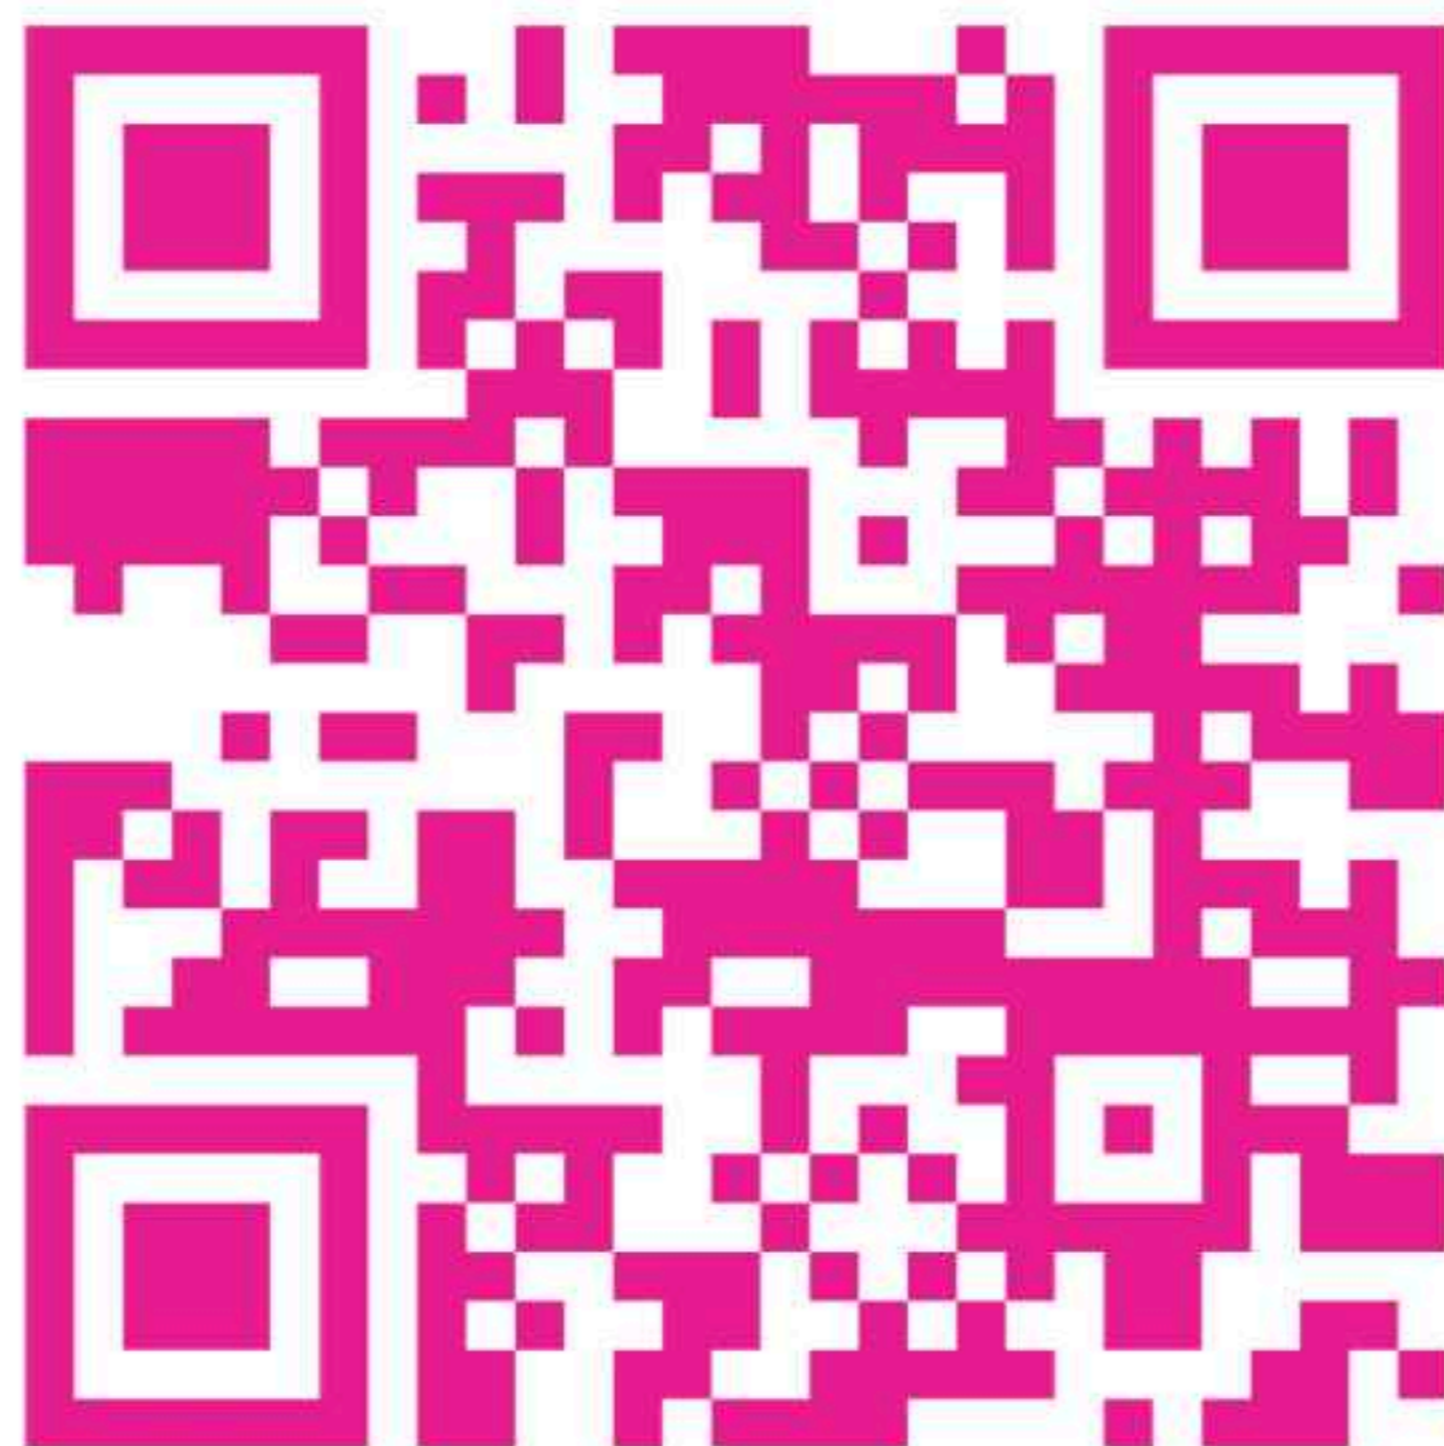

Accessibility | Accountability
Community | Creativity
Equity & Anti-Racism
Intersectionality | Liberation

Based in Sonoma County, Positive Images is an LGBTQIA+ Community Center established in 1990. We provide support to the North Bay's LGBTQIA+ population, with an emphasis on identities and individuals at the margins – including

transgender and nonbinary individuals, LGBTQIA+ people of color, Latine families, neurodivergent people, and disabled people. We are dedicated to providing essential services that encompass mental health support, advocacy, and education.

Our vision extends beyond the conventional approach of LGBTQIA+ centers, as we actively practice anti-racism, cultivate culturally informed programming, offer training that promotes understanding and empathy, and relentlessly uplift identities that have long been marginalized, including transgender and nonbinary individuals, LGBTQIA+ people of color, Latine families, neurodivergent people, and disabled people.

The Time is Ripe

seasonal produce, seasonal recipes

Find your star ingredients in our 100% Organic Produce Department!

Green Garlic is young garlic harvested in early spring when the plants are still immature and green. The stalks look like miniature leeks, with a white base, flat, firm green leaves, and a telltale pink blush near the bulb end. Originally harvested because growers needed to thin out garlic plants so they'd develop properly, stalks of green garlic are now a highly sought-after produce item. Green garlic tastes like a cross between a leek and a green onion, with a hint of garlicky pungency. Green garlic is available in early spring, one of the first aromatic greens to appear as the weather starts to warm up.

To prep green garlic, rinse it well, trim away the root end and any yellowing leaves, then cut or chop the rest as you would scallions, but use both the green & white portions.

Green Garlic Pesto

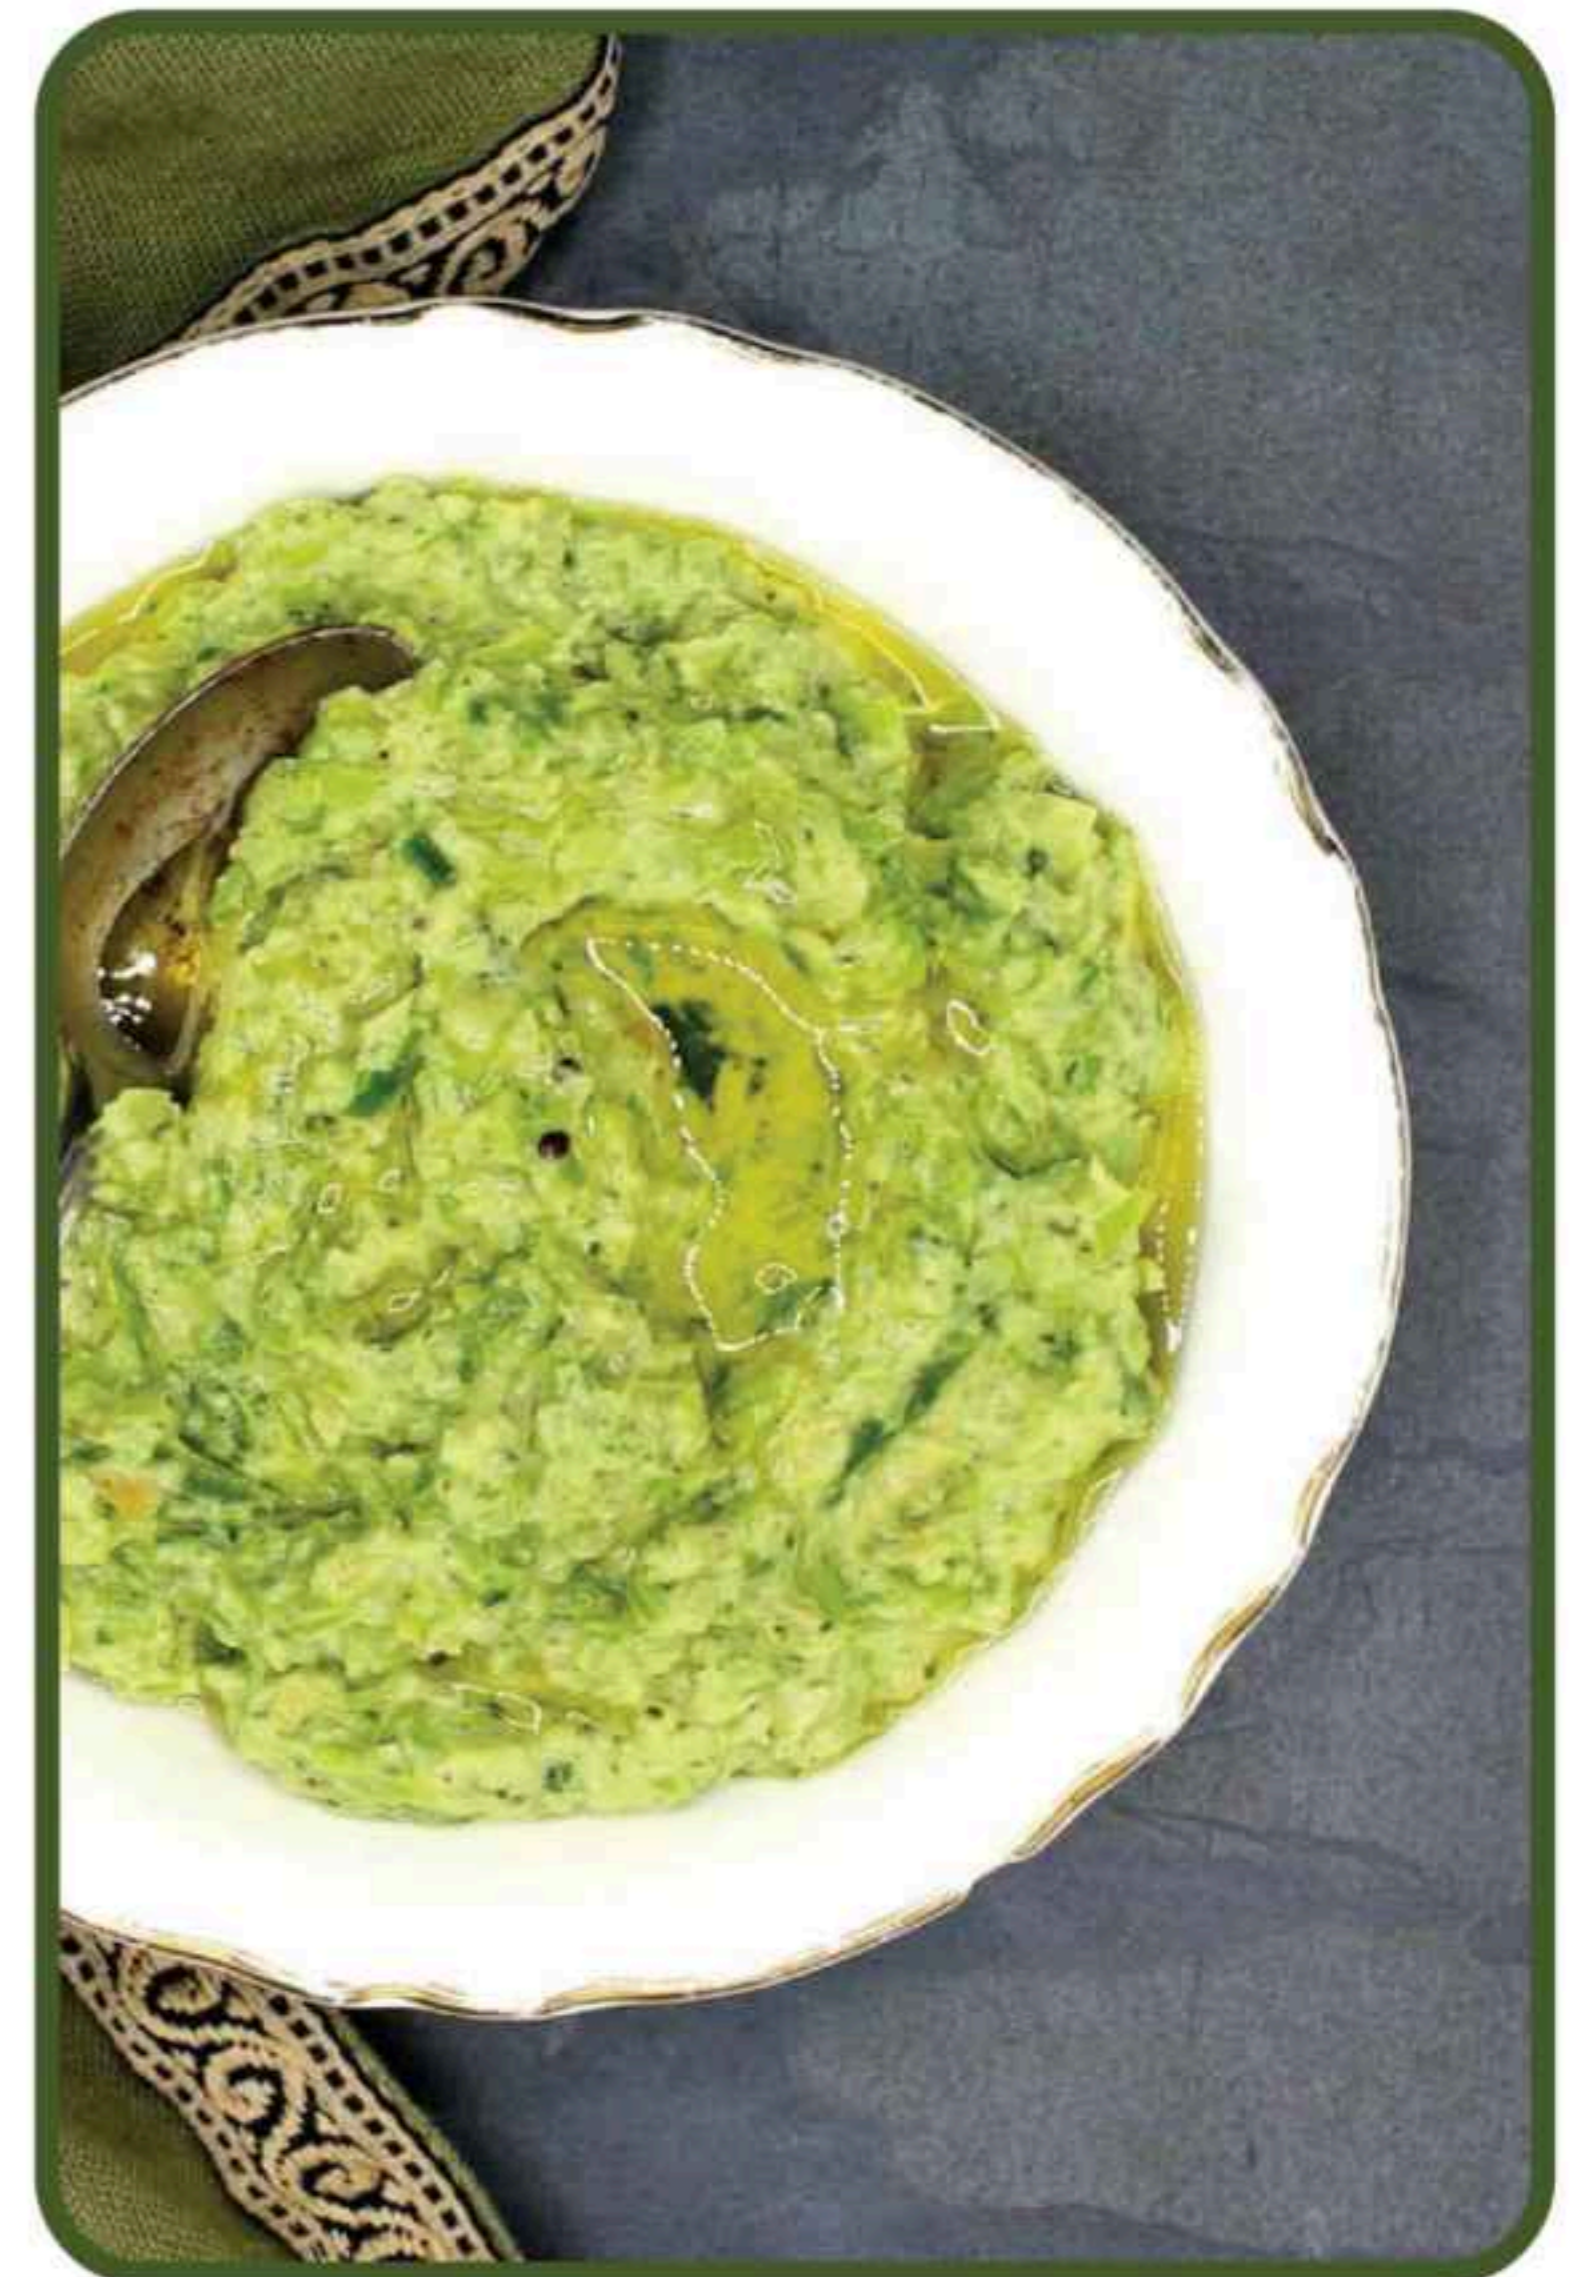

by Holy Cow Vegan

INGREDIENTS

- 6 stalks garlic greens (trim and chop the green and white parts)
- ½ cup basil leaves
- ¼ cup pumpkin seeds (lightly toasted in a skillet)
- 2 tablespoons nutritional yeast
- Juice of 1 lemon
- Salt and ground black pepper to taste
- ¼ cup extra virgin olive oil

DIRECTIONS

1. Place all pesto ingredients except the olive oil in a food processor.
2. Pulse the ingredients 5-10 times so they are coarsely chopped.
3. Next, with the blade running, pour the olive oil through the feed tube until a coarse but homogenous paste forms. You may need to add a few tablespoons of water to break down the green garlic completely and form a paste. Keep in mind that the garlic greens might take some time to process, so you would need to run the processor longer than you would for, say, a basil pesto.
4. Check salt and add more if needed.
